Dear Sir/Madam:

**RE: Concrete Reinforcing Bar 1  
Request for Normal Value Reviews – Turkey**

These submissions are filed on behalf of AltaSteel Inc. (“**AltaSteel**”), ArcelorMittal Long Products Canada G.P. (“**AMLPC**”), Gerdau Ameristeel Corporation (“**Gerdau**”), and Max Aicher (North America) Ltd. (“**MANA**”) (collectively, the “**Domestic Producers**”). These four companies are domestic producers of concrete reinforcing bar (“**rebar**”) and participants in the Canada Border Services Agency’s (the “**CBSA**”) two normal value reviews and three re-investigations into dumped rebar from Turkey.<sup>1</sup>

The Domestic Producers hereby request that the CBSA initiate normal value reviews (“**NVR**”) for four Turkish producers: Çolakoğlu Metalurji A.S. (“**Colakoglu**”), İçdas Çelik Enerji Tersane ve Ulaşım A.Ş. (“**Icdas**”), Kaptan Demir Celik Endustrisi ve Ticaret A.S. (“**Kaptan**”), and Kroman Çelik Sanayii A.Ş. (“**Kroman**”) (collectively, the “**Turkish Exporters**”). The Turkish Exporters have normal values that were last updated several years ago and no longer reflect market pricing and costs. There is [ ] at outdated normal values.

- Icdas and Colakoglu’s normal values were last updated in December 2018 and are based on their sales and cost data for April and May 2018.<sup>2</sup> Their normal values are issued in U.S. dollars.

---

<sup>1</sup> RB1 2018 UP COLAKOGLU, Concrete Reinforcing Bar, Notice of Conclusion of Normal Value Review (December 18, 2018); RB1 2018 UP ICDAS, RB1&2 2017 RI, Certain Concrete Reinforcing Bar, Notice of Conclusion of Re-investigation (May 4, 2018); RB 2017 RI, Certain Concrete Reinforcing Bar, Notice of Conclusion of Re-investigation (September 1, 2017); Notice of Conclusion of Re-investigation, Certain Concrete Reinforcing Bar (June 29, 2016).

<sup>2</sup> Public Attachment 1: Colakoglu public representations in its request for a normal value review dated December 4, 2020 at p. 2; Public Attachment 2: ICDAS public representations in its request for a normal value review dated October 9, 2020 at p. 1.

- Kaptan and Kroman's normal values were last updated in May 2018 and are likely based on their sales and cost data for September and October 2017.<sup>3</sup> Their normal values are issued in Turkish lira.

There has been a fundamental change in circumstances in the prices and costs for Turkish rebar producers since the Turkish Exporters were last issued normal values, and more specifically, over the past few months. As a result, their normal values are stale, no longer reflect market prices and costs, and need to be updated.

The Domestic Producers submit that the CBSA request information for a recent period of investigation, such that the 60-day period for sales and cost data be as recent as December 2020 (i.e., a 60-day period between December 2020 to March 2021).

The obsolescence of the Turkish rebar pricing and cost data that was used to calculate current normal values was recently confirmed by Icdas and Colakoglu when they requested that NVRs be initiated in October and December 2020 respectively.<sup>4</sup> While the Domestic Producers opposed those requests at that time due to the volatility in global prices caused by the COVID-19 pandemic, rebar pricing and costs have now stabilized and [ ].

### **Initiating supports the purpose of NVRs and SIMA**

The Domestic Producers seek to have normal values for the Turkish Exporters updated to reflect prices and/or costs that have stabilized since the economic downturn. Current normal values are outdated and do not reflect current and forecasted prices and costs.

The purpose of NVRs is to keep normal values “up-to-date in order to ensure effective enforcement of the Canadian International Trade Tribunal's (CITT) orders and findings.”<sup>5</sup> Ensuring that exporters from countries subject to SIMA findings have to sell into Canada at fairly traded prices is consistent with this purpose.

Indeed, pursuant to the CBSA's D-memoranda on NVRs, this is a “strong case” for conducting a NVR because over two years have elapsed since the values were last issued, costs and Turkish selling prices have risen significantly since then (scrap prices have at least doubled)<sup>6</sup>, and there is

---

<sup>3</sup> RB1&2 2017 RI, Certain Concrete Reinforcing Bar, Notice of Conclusion of Re-investigation (May 4, 2018). The CBSA's period of investigation was May 1, 2017 to October 31, 2017 so the last 60-day period is September 1 to October 31, 2017.

<sup>4</sup> Public Attachment 1: Colakoglu public representations in its request for a normal value review dated December 4, 2020 at p. 2; Public Attachment 2: ICDAS public representations in its request for a normal value review dated October 9, 2020 at p. 1.

<sup>5</sup> CBSA, *Re-investigation and Normal Value Review Policy – Special Import Measures Act (SIMA)*, Memorandum D14-1-8 (July 19, 2019), at para 1 [“Re-Investigation Policy”].

<sup>6</sup> Confidential Attachment 3: MetalBulletin pricing for Turkish domestic rebar and scrap.

an [ ]:<sup>7</sup>

13. Depending on the results of the CBSA's analysis, a decision will be made as to whether normal values, export prices and/or amounts of subsidy for a certain measure in force need to be updated. For example, if several years have elapsed since the values were last issued, the costs and domestic selling prices of the goods have risen considerably over the past two-year period, and a significant number of new products are currently being imported into the Canadian market, **the CBSA would consider this a strong case for conducting a re-investigation or normal value review.**

While the Re-investigation Policy notes that NVRs are “generally” done for three or less exporters<sup>8</sup>, the CBSA may nonetheless conduct a NVR for four exporters. Indeed, it recently initiated NVRs against six exporters in *Carbon Steel Fasteners*.<sup>9</sup> Five NVRs were initiated on January 25, 2021 and a sixth was initiated on March 1, 2021.

Moreover, CBSA should also consider the substantive question of whether updated normal values are likely to be more or less representative of present and near-term market conditions. Conducting a NVR at this time will decrease the gap between prospective normal values and prospective Turkish prices and costs. In other words, if CBSA were to initiate a NVR, it would be addressing a distortion in the market by determining updated normal values based on current and forecasted prices and costs.

Lastly, updating normal values to capture a period of stabilized pricing is also consistent with the purpose of SIMA which is to protect the domestic industry. Indeed, the Tribunal and the Federal Court have consistently held that “the object and purpose of SIMA is to protect domestic industries from injury caused or threatened by the dumping or subsidizing of foreign goods”.<sup>10</sup> The evidence described in and attached to this letter demonstrates that updating normal values at this time would result in normal values reflecting prevailing market prices. This would protect the domestic industry from injury.

The Domestic Producers also request that updated normal values be applied retroactively to any Turkish rebar imports arriving after initiation of a NVR but before the conclusion of the NVR.

The importer [ ].

Further, Turkish exporter Kaptan was recently active in the Canadian market. It shipped over 20,000 MT of rebar to Canada in May 2020 at prices that undercut domestic producer prices.<sup>12</sup>

### **Turkish rebar and scrap prices have increased significantly**

These submissions compare Turkish domestic rebar pricing from the 60-day periods mentioned above (i.e., September/October 2017 for Kaptan and Kroman and April/May 2018 for Icdas and Colakoglu) with March 2021 data (most recent). They also compare the price of scrap in Turkey as reported by MetalBulletin. Scrap is the main raw material input in the production of rebar.

---

<sup>11</sup> Confidential Attachment 4: AMLPC information package; Confidential Attachment 5: Gerdau information package; Confidential Attachment 6: MANA information package.

<sup>12</sup> Confidential Attachment 4: AMLPC information package. AMLPC has a picture of the rebar from this shipment and the rebar is stamped with “KD Turkey”, meaning the rebar was made by Turkish producer Kaptan Demir.

**Table 2**  
**MetalBulletin Domestic Scrap Prices in Turkey (TRY/MT)<sup>13</sup>**

| Average price (TRY/MT)                            | Turkish scrap<br>(domestic) |
|---|-----------------------------|
| Sept/Oct 2017                                     | [ ]                         |
| April/May 2018                                    | [ ]                         |
| March 2021  | [ ]                         |
| <b>TRY/MT increase since NVs were calculated:</b> |                             |
| Sept/Oct 2017 vs March 2021                       | [ ]                         |
| April/May 2018 vs March 2021                      | [ ]                         |
| <b>% increase since NVs were calculated:</b>      |                             |
| Sept/Oct 2017 vs March 2021                       | [ ]                         |
| April/May 2018 vs March 2021                      | [ ]                         |

Table 2 above demonstrates that Turkish scrap pricing has almost tripled (from TRY [ ]/MT to TRY [ ]/MT) since the period in which cost data for Kaptan and Kroman's normal values are based and has more than doubled (from TRY [ ]/MT to TRY [ ]/MT) since the period in which Icdas and Colakoglu's cost data for normal values are based.

A similar trend occurs when looking at Turkish rebar prices. The following table compares rebar prices for each Turkish Exporter from March 2021 to their respective 60-day periods:

**Table 3**  
**Turkish Exporter Rebar Prices (TRY/MT)<sup>14</sup>**

| Average price (TRY/MT)                            | Kroman | Kaptan | Icdas | Colakoglu |
|---|--------|--------|-------|-----------|
| Sept/Oct 2017                                     | [ ]    |        |       | [ ]       |
| April/May 2018                                    | [ ]    |        |       | [ ]       |
| March 2021  | [ ]    |        |       | [ ]       |
| <b>TRY/MT increase since NVs were calculated:</b> |        |        |       |           |
| Sept/Oct 2017 vs March 2021                       | [ ]    |        |       | [ ]       |
| April/May 2018 vs March 2021                      | [ ]    |        |       | [ ]       |
| <b>% increase since NVs were calculated:</b>      |        |        |       |           |
| Sept/Oct 2017 vs March 2021                       | [ ]    |        |       | [ ]       |
| April/May 2018 vs March 2021                      | [ ]    |        |       | [ ]       |

Table 3 above demonstrates that domestic rebar prices for the Turkish Exporters have doubled since their normal values were last issued, increasing by [ ].

<sup>13</sup> Pricing for March is through week of March 12, 2021. Confidential Attachment 3: MetalBulletin pricing for Turkish domestic rebar and scrap.

<sup>14</sup> Pricing is for March is through March 17, 2021. Confidential Attachment 7: Summary of Turkish rebar prices; Public Attachment 8: Turkish rebar prices by exporter from DemirFiyatlari.com (in Turkish only).

These are significant increases that warrant updating the normal values for the Turkish Exporters.

### **Global and Turkish rebar prices have stabilized**

The global coronavirus pandemic, and corresponding economic downturn, affected rebar pricing and demand in every market. However, pricing has stabilized and demand is recovering.

Table 4 below reports CRU's prices for rebar, both past and forecast. The data compares CRU pricing from the 60-day periods mentioned above through Q1 2021 for various markets (no pricing available for Turkey).

**Table 4**

Table 4 above demonstrates that global rebar prices [ ]. Pricing has since recovered and stabilized in late 2020 and early 2021.

---

<sup>15</sup> Confidential Attachment 9: CRU, Steel Long Products Market Outlook - Price Update - March 2021. Notes for pricing: USA Midwest is FOB US Midwest mill, Germany is from parity point, Asia is CFR East & South East Asian port, China is ex-warehouse, Shanghai, CIS export is FOB, Black Sea, and UAE is delivered.

## Depreciation of the Turkish Lira

In the event that CBSA initiates a NVR, the Domestic Producers submit that any normal values for the Turkish Exporters should be calculated in U.S. dollars (rather than in Turkish lira).

The Turkish lira depreciated rapidly and significantly in 2017 and 2018, as noted by the CITT in its Safeguard Inquiry.<sup>16</sup> In the NVR that concluded in December 2018 (when Icdas and Colakoglu's normal values were last updated), the CBSA established normal values in U.S. dollars: "The information on the record shows a volatile exchange rate for the Turkish Lira and high levels of inflation in Turkey. To address these factors the CBSA issued the normal values to Icdas and Colakoglu in U.S. Dollars."<sup>17</sup>

The Turkish Lira continued to depreciate in 2019, 2020 and 2021.<sup>18</sup> From January 2019 to February 2021, the Turkish Lira depreciated a further 28%.

**Table 5**  
**Average Foreign Exchange Rates: Turkish Lira to CAD<sup>19</sup>**

| Period         | FX     | y-o-y % change |
|----------------|--------|----------------|
| 2017           | 0.3565 |                |
| 2018           | 0.2759 | -23%           |
| 2019           | 0.2340 | -15%           |
| 2020           | 0.1930 | -18%           |
| Jan./Feb. 2021 | 0.1755 | -9%            |

The value of the Turkish Lira has continued to fall over the last 4 years.<sup>20</sup> Icdas and Colakoglu's normal values were last updated based on sales and cost data from April and May 2018. At that time, the value of the Turkish Lira was TRY 0.3025 to the Canadian dollar. In February 2021, the Turkish Lira is only 0.1789, a decrease of 41%. Assuming the normal values for Kaptan and Kroman are based on sales and cost data from September and October 2017, the value of the Turkish Lira was TRY 0.3481 to the Canadian dollar. This represents a decrease of 49% compared to February 2021.

For these reasons, any new normal values for the Turkish Exporters must be established in U.S. dollars (not Turkish Lira).

<sup>16</sup> *Certain Steel Goods*, Safeguard Inquiry No. GC-2018-001 (April 3, 2019) at p. 56, 57, 64. The Tribunal stated: "The information on the record indicates that the Turkish lira lost 7.2 percent of its value versus the Canadian dollar in 2016, followed by a further 23.3 percent decline in 2017 and finally another 32.3 percent decline in 2018."

<sup>19</sup> *Ibid.*

<sup>20</sup> *Ibid.*

## **Conclusion**

From time-to-time it is necessary to update prospective normal values. The normal values of the four Turkish Exporters have not been updated in over two years, domestic prices and costs have increased substantially, and there is [ ].

We request that the CBSA initiate a NVR for the four Turkish Exporters at this time.

Yours truly,

Conlin Bedard LLP

Dear Mr. McNally:

Re: Certain Concrete Reinforcing Bar – Request for Normal Value Review

I write on behalf of Çolakoğlu Metalurji A.S. ("Çolakoğlu") to request that the CBSA initiate a review of the normal values last issued to Çolakoğlu on 18 December 2018. Çolakoğlu's current prospective normal values are based on its sales and cost data for April and May 2018 and no longer reflect market conditions.

Çolakoğlu's domestic selling prices and raw material costs have been declining steadily since June 2018, as summarized in the tables below.

**Table 1 — Colakoğlu Decrease in Domestic Selling Prices by Size Designation**

\*For these designations, there were no sales in June 2018. Therefore, selling prices for May 2018 were used.

**Table 2 – Çolakoğlu - Decrease in Raw Material Costs**

| Raw Material | Average Cost June 2018 USD/MT | Average Cost October 2020 USD/MT | Decrease |
|--------------|-------------------------------|----------------------------------|----------|
| [ ]          |                               |                                  |          |
|              |                               |                                  |          |
|              |                               |                                  | ]        |

The significant and steady declines in Çolakoğlu's domestic selling prices summarized above reflect the significant gap between current prospective normal values and current selling prices in Turkey, as summarized in the table below.

**Table 3 – Çolakoğlu – Current Normal Values versus Current Domestic Selling Prices**

| Designation | Current Normal Value USD/MT | Average Selling Price October 2020 USD/MT | Difference |
|-------------|-----------------------------|---|------------|
| [ ]         |                             |   |            |
|             |                             |   |            |
|             |                             |   |            |
|             |                             |   |            |
|             |                             |   |            |
|             |                             |   | ]          |

The decline in domestic selling prices in Turkey should come as no surprise since it is consistent with the global decline in rebar prices acknowledged by the CBSA in its Statement of Reasons for Initiation for the Rebar 3 Investigation.<sup>1</sup>

As a result of the significant misalignment between current prospective normal values and current market conditions, Çolakoğlu is unjustly prevented from fairly participating in the Canadian rebar market. These circumstances require that CBSA initiate a review of normal values (or reinvestigation) as part of the proper enforcement of measures under the *Special Import Measures Act*.

Çolakoğlu takes this opportunity to address concerns raised by ArcelorMittal Long Products Canada G.P., Gerdau Ameristeel Corporation and Max Aicher North America Ltd. (collectively, the "Domestic Producers") in response to the request for a normal value review submitted to CBSA by ICDAS Celik Enerji Tersane ve Ulasim Sanayi A.S. ("ICDAS") on 9 October 2020. The Domestic Producers argue that the object and purpose of SIMA is to protect the domestic industry. Çolakoğlu notes that the object and purpose of the CBSA's Trade and Anti-dumping Programs Directorate is to apply SIMA, as written. This includes ensuring that, pursuant to section 3, SIMA duties are equal to (not more or not less) than the margin of dumping. This necessarily requires updating normal values to reflect changes in market conditions. Normal values for Çolakoğlu and ICDAS were last

<sup>1</sup> Certain Concrete Reinforcing Bar – Initiation Statement of Reasons dated 7 October 2020 at para. 115.

updated nearly two years ago, during which time market conditions have changed significantly. While the Domestic Producers express concerns that normal values updated now may not reflect market conditions in the near future, those concerns are based on nothing more than speculation. As the CBSA is well aware, exporters are required to advise CBSA of changes in market conditions and to price their export sales in line with those changes regardless of what their normal values may be. In any event, should market conditions in the future change such that normal values are no longer considered to reflect those conditions, the Domestic Producers may make representations to the CBSA to that effect.

Çolakoğlu would be pleased to provide any further information you may require. If you have any questions, please do not hesitate to contact me.

Yours very truly,

Victoria Bazan

Dear Mr. McNally:

Re: Certain Concrete Reinforcing Bar – Request for Normal Value Review

I write on behalf of ICDAS Celik Enerji Tersane ve Ulasim Sanayi A.S. ("ICDAS") to request that the CBSA initiate a review of the normal values last issued to ICDAS on 18 December 2018. ICDAS' current prospective normal values are based on its sales and cost data for April and May 2018 and no longer reflect market conditions.

ICDAS's domestic selling prices and raw material costs have been declining steadily since June 2018, as summarized in the tables below.

**Table 1 – ICDAS - Decrease in Domestic Selling Prices by Size Designation**

**Table 2 – ICDAS - Decrease in Raw Material Costs**

| <b>Raw Material</b> | <b>Average Cost June 2018 USD/MT</b> | <b>Average Cost August 2020 USD/MT</b> | <b>Decrease</b> |
|---------------------|--------------------------------------|--|-----------------|
| [ ]                 |                                      |  |                 |
|                     |                                      |  | [ ]             |

The significant and steady declines in ICDAS' domestic selling prices summarized above reflect the significant gap between current prospective normal values and current selling prices in Turkey, as summarized in the table below.

**Table 3 – ICDAS – Current Normal Values versus Current Domestic Selling Prices**

| <b>Designation</b> | <b>Current Normal Value USD/MT</b> | <b>Average Selling Price August 2020 USD/MT</b> | <b>Difference</b> |
|--------------------|------------------------------------|---|-------------------|
| [ ]                |                                    |   |                   |
|                    |                                    |   |                   |
|                    |                                    |   |                   |
|                    |                                    |   |                   |
|                    |                                    |   |                   |
|                    |                                    |   |                   |
|                    |                                    |   | [ ]               |

The decline in domestic selling prices in Turkey should come as no surprise since it is consistent with the global decline in rebar prices acknowledged by the CBSA in its Statement of Reasons for Initiation for the Rebar 3 Investigation.<sup>1</sup>

As a result of the significant misalignment between current prospective normal values and current market conditions, ICDAS is unjustly prevented from fairly participating in the Canadian rebar market. These circumstances require that CBSA initiate a review of normal values (or reinvestigation) as part of the proper enforcement of measures under the *Special Import Measures Act*.

ICDAS would be pleased to provide any further information you may require. If you have any questions, please do not hesitate to contact me.

Yours very truly,

Victoria Bazan

Dear Sir/Madam:

**RE: Concrete Reinforcing Bar 1  
Request for Normal Value Reviews – Turkey**

My name is Philippe Boulanger and I am the Vice-President and Chief Marketing Officer at ArcelorMittal Long Products Canada, G.P. ("AMLPC"). AMLPC is a Canadian rebar producer.

We are aware of [ ].  
We are not aware of the [ ].

The [ ].

Further, Turkish exporter Kaptan was recently active in the Canadian market. It shipped over 20,000 MT of rebar to Canada in May 2020 at prices that undercut domestic producer prices.

AMLPC therefore requests that normal value reviews be initiated against Çolakoğlu Metalurji A.S., İçdas Çelik Enerji Tersane ve Ulaşım A.Ş., Kaptan Demir Celik Endüstrisi ve Ticaret A.S., and Kroman Çelik Sanayii A.Ş.

Yours truly,

A handwritten signature in blue ink, appearing to read "P. Boulanger".

Philippe Boulanger

**RE: Certain Concrete Reinforcing Bar 1 / Rebar – RB1 / Request for Normal Value Reviews – Turkey**

Gerdau has obtained the following market intelligence concerning rebar imports from Turkey that are expected to arrive in April 2021 at the open of navigation:

- [ ]
- [ ]

For both shipments, the prices have been anywhere from [ ] below the prices I was quoting to our customers.

A handwritten signature in blue ink, appearing to read "Dan Bourdon".

Counsel for MANA

**NON-CONFIDENTIAL**

LEGAL\_35909912.1

1. My name is Walter Sommerer. I am the Chief Executive Officer of Max Aicher (North America) Limited (“MANA Group”). This declaration concerns future imports of rebar from Turkey.

## **I. Upcoming imports of Turkish rebar**

2. I am aware of [ ]. There may well be more.
3. The [ ]. It was ordered by IRPEX (formerly Intermetal). IRPEX has not previously been as active as Ferrostaal (now Jebsen & Jessen or “J&J”) or Acierco in importing dumped rebar into Canada. It has recently started to follow the harmful examples set by these others importers, and joined in this disruptive and harmful dumping. IRPEX may believe that because they are based in Turkey and UK with merely a representative in Toronto, and presumably operating as a non-resident importer, that they are shielded from anti-dumping duties, and thus have little concern for Canadian anti-dumping measures.
4. Based on our information, the shipment is from a Turkish mill other than ICDAS that has normal values. We have not been able to determine precisely which mill, though our information suggests Kaptan. We understand this material is in production and that the vessel will arrive late April.
5. IRPEX has a [ ].
6. The end of May will [ ].
7. All of these prices are significantly below Canadian market prices, which is even more troubling because ocean freight costs have virtually doubled since last year. This dumped

Turkish rebar is preventing Canadian rebar orders and injuring MANA and other domestic producers.

## **II. Turkish rebar exporters are focussed on North America**

8. On March 15, 2021, I attended the virtual annual conference of the International Rebar Producers and Exporters Association (“IREPAS”). One of the notable events was a panel discussion with certain executives of international rebar producers. This included Murat Cebecioglu, an executive at ICDAS with the title Export Manager.
9. During the question and answer session of the panel discussion, he was asked what his target markets were. He replied without hesitation that North America was the primary target market for ICDAS and other Turkish rebar producers. While the US is a larger market than Canada, Mr. Cebecioglu referred to North America generally. This must have meant Canada was included as a main target for Turkish rebar producers.
10. Given the number of countries, including the US and Canada, that have imposed protective trade measures against Turkish rebar, I was surprised at such a candid admission from Mr. Cebecioglu. Because this was a virtual conference, Mr. Cebecioglu may not have appreciated the size of his audience, or the diversity of interests of his audience (such as myself). His admission further confirmed our commercial intelligence about ICDAS actively trying to exploit outdated normal values to export large volumes of dumped rebar to Canada.

Xe: TRY / CAD Currency Chart. Turkish Lira to Canadian Dollar Rates

[Get the App](#)

### Xe Currency Charts: TRY to CAD

The screenshot shows the Xe Currency Charts interface for converting TRY to CAD. At the top, there are four main buttons: 'Convert' (with a gear icon), 'Send' (with a mail icon), 'Chart' (with a line graph icon), and 'Alerts' (with a bell icon). Below these, the 'From' section is set to 'TRY - Turkish Lira' with a dropdown arrow. To the right of this, a note says 'We use midmarket rates'. The 'To' section is set to 'CAD - CanadaDollar' with a dropdown arrow. Below the currency inputs is a large blue button labeled 'View transfer quote'. At the bottom, there is a chart titled 'TRY to CAD Chart' showing the exchange rate over time. The chart includes a line graph and some text. Below the chart are time period buttons: '12H', '1D', '1W', '1M', '1Y', '2Y', '5Y', and '10Y'. The current exchange rate shown is '1 TRY = 0.166105 CAD' as of 'Mar 17, 2021, 02:30 UTC'.

Xe: TRY / CAD Currency Chart. Turkish Lira to Canadian Dollar Rates

SIMA Registry and Disclosure Unit  
Anti-Dumping and Countervailing Directorate  
Canada Border Services Agency  
100 Metcalfe Street, 11<sup>th</sup> Floor  
Ottawa, ON K1A 0L8

Dear Sir/Madam:

**RE: Concrete Reinforcing Bar 1  
Request for Normal Value Reviews – Turkey**

AltaSteel Inc. (“AltaSteel”) is a producer of concrete reinforcing bars.

AltaSteel supports the request by the Domestic Rebar Industry that the CBSA initiate normal value reviews (“NVR”) for four Turkish producers: Çolakoglu Metalurji A.S. (“Colakoglu”), İçdas Çelik Enerji Tersane ve Ulaşım A.Ş. (“İcdas”), Kaptan Demir Celik Endustri ve Ticaret A.S. (“Kaptan”), and Kroman Çelik Sanayii A.Ş. (“Kroman”) (collectively, the “Turkish Exporters”).

The Turkish Exporters have normal values that were last updated several years ago and no longer reflect market pricing and costs. When this has occurred in the past, AltaSteel along with other domestic producers has faced injury.

Yours Truly,

A handwritten signature in black ink.

Benjamin Zurbigg
