Non-confidential summary of attachments to ruling request for Base Transceiver Station Systems containing aluminum extrusion components subject to SIMA (Nokia Canada Inc.)

*The following CONFIDENTIAL attachments contain commercially sensitive confidential business information in their entirety. We request that this information be treated as strictly confidential as it would be harmful to Nokia Canada Inc. if it were disclosed or otherwise made available to the competitors of same. As such, the contents of these attachments are not included in the non-confidential (public) version.*

- 1. btsDetails.pdf: contains details regarding the individual components of the BTS system (description, function) including suppliers' names and addresses as well as country of sourcing.*
- 2. btsInstallationDiagram.pdf: diagram depicting the suggested deployment of the BTS system modules (pole and wall configurations).*
- 3. packingListExample.pdf: contains an example of the typical packing arrangement for a BTS system; includes internal Nokia part numbers as well as one of Nokia's customer's name and address.*
- 4. Additional product details for individual BTS system components (15 files): files containing the technical specifications as well as technical drawings for the individual components of a BTS system.*
- 5. b3Transaction13284635277886.pdf: includes a completed B3 form reflecting the importation by Nokia of a BTS system into Canada as well as supporting documentation (bill of lading, import invoices, and packing lists).*
